## INTERNSHIP

Frontend and Design Thinking, Intern

**TurnOnWeb Solutions Pvt Ltd**

📅 June 2023 – Aug 2023

- Collaborated closely with the design team to implement a user-centred redesign of the company website using HTML, CSS and React.js.
- Developed dynamic animations and transition that enhance user interaction, resulting in increased engagement and prolonged on-site browsing durations.
- Turned design blueprints into flexible and visually appealing design elements, ensuring that user have a smooth and enjoyable experience on different devices.

Marketing and Promotion Intern

**Light Bite Foods pvt ltd**

📅 Jun 2017 – Aug 2017

- Provide support to the marketing team in the execution of marketing campaigns and events.
- Collects quantitative and qualitative data from marketing campaigns.
- Assist and Manages the team in Advertising promotional activities.

## PROJECTS

Textutils (Dynamic and Responsive Website)

**html, css, bootstrap, react**

📅 December 2022 – January 2022

- Implemented React's state, employing the 'useState' hook for efficient handling of dynamic content updates without page reload.
- Ensures seamless user experience across devices by implemented Bootstrap's responsive design features, enhancing accessibility and user satisfaction.
- Technologies used - Utilized React.js for building the user interface, React Router for client-side navigation, and Bootstrap for responsive design components.

ChatBots

**nlp, machine learning**

📅 Sep 2023 – Oct 2023

- Designed and developed an intelligent chatbot. Designed the conversation flow, ensuring seamless and contextually relevant interactions with users.
- The chatbot was trained to understand user queries, provide accurate responses, and engage in interactive conversations, enhancing user experience and automating customer support processes.
- Technologies used - Natural Language Processing, Machine Learning, PyTorch.
